DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-6 are indefinite as to the terms "ONO-2506" and "CB-1093". Such terms fail to set forth the intended compounds.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wallace et al. (US 5,166,317) in view of WO 00/32197 and further over Glaser et al. (US 5,767,079) and The Drugs of Future 1997, 22(9)(submitted by the applicant) for the reasons set forth on pages 2-5 of the office action of June 18, 2008 and the following reasons.

Glaser et al. teach the use of transforming growth factor for the treatment of different ophthalmic disorders. See the abstract. Dry eye is considered to be one of the disorders treated by the growth factor. See column 1, lines 15-30. Glaser also teaches that other growth factors which have wound healing and neurotrophic effect may also be used. See column 2, lines 28-30. Drugs of the Future teaches the AIT-082 is the first

growth factor mimetic compound. Therefore, it would have been obvious to use a growth factor mimetic agent for the treatment of the disorders that are treated by growth factor, such as dry eye.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to the differences in chemical structures and the size of the compounds used by Wallace et al. in comparison to the smaller molecules of the claimed invention. Applicant is reminded that the obviousness rejection is based on the function of the claimed compounds as neurotrophic factor. Therefore, it is expected that any neurotrophic factor would be able to accomplish the function in the absence of evidence to the contrary.
